Science has created remarkable researches in the field of medicines and surgery. Surgery is very costly and mostly it is out of reach of poor patients. Still there are certain diseases which could not be treated properly till now with 100% result. Piles/Hemorrhoids is one of them which at later stage turn into Colorectal Cancer/Bowel Cancer. In this article I shall try to deal with these problem and to provide a result oriented medicine which gives 100% guaranteed success in the cases of these problems.

It is very common anoctal disease. It is defined as the symptomatic enlargement and/or distal displacement of anal cushion which are prominence of anal mucosa formed by loose connective tissues, smooth muscle, arterial and venous vessels.

True prevalence/expansion of hemorrhoids is not known so far. On the basis of epidemiologic study in U.S in 1990 it was estimated that 25% of British people and 75% of American citizens would face this disease once in their life particularly in their old age or during their pregnancy. In Google Zeitgeist 2012 Hemorrhoids/Piles was the top trending health issue in U.S. only. Ahead of gastro esophageal reflux disease and sexually transmitted diseases. Unfortunately the quality of information about Hemorrhoids/Piles treatment on internet and on various websites is of very poor quality. There is no permanent cure of this disease even after surgery which is known as last way out to cure this disease.

This article deals with some fundamental knowledge and prevailing ways to treat uncomplicated and complicated Hemorrhoids/Piles.

Cause: Enlargement of veins around the anus cause Hemorrhoids/Piles. This can be due to the following reasons.

1. **Pregnancy:** During pregnancy this problem increases because size of uterus increase. It puts the pressure on veins in the colon, causing it to bulge.
2. **Chronic Constipation:** The patient has to put extra pressure to turn out the stool. It puts extra pressure on the walls of blood vessels in case of chronic constipation.
3. **Continuous Sitting for Long period:** Sitting for long time in a single position also becomes a reason for hemorrhoids.
4. **Wine:** The excess use of wine or hard drinks or other intoxicated materials in excess will be a cause for the growth of Hemorrhoids/Piles.
5. **Red Chilly:** The use of red chilly in excess is also a reason for

development of Hemorrhoids.

6. **Old Age:** This problem is also increase in old age. Due to weak system to handle it.
7. **Wounds and Ulcer in Food pipe** also causes bleeding.
8. **Un-natural sex:** Apart from other reasons mentioned, I found another reason which is most common and that is unnatural sex.

It is most prominent reason for the occurrence of Hemorrhoids/Piles. If a person male of female had ever committed this mistake, it is certain that he/she will have to face this problem even after a period of ten years.

Symptoms: The main symptoms of Hemorrhoids/Piles are

1. Itching or irritation in the anal area.
2. Painless bleeding or bleeding with pain.
3. Bleeding with stool or otherwise.
4. Swelling on or around the anal area.
5. Leaking Feces.
6. Lumps in the anal region.
7. Wound/ Ulcer in food pipe can also be a cause of bleeding with stool or otherwise.

How patients of Hemorrhoids/Piles feel?

1. Patients feel very much tired due to flow out of blood in excess.
2. The Patient remains live under tension
3. The Patient feels weakness and dizziness. Or some time feel breathlessness.
4. There is weight loss in many of the patient at the extreme stage.
5. The Patient feels it difficult to walk and sit due to weakness and continues bleeding.

Types of Hemorrhoids /Piles

1. **External Hemorrhoids:** These Hemorrhoids are visible near the anus and can be viewed from outside. These are generally more painful. It is due to presence of most sensitive nerve in this area. When stool passes, the strain due to nerves may cause them to bleed and pain.
2. **Internal Hemorrhoids:** These are deep inside the rectum and not visible from outside. They are normally painless. The first sign of presence of hemorrhoids is rectal bleeding. Due to straining some time swelling occurs and it pushes the internal hemorrhoids. It can be painful too. In the prevailing medical

science there are two types of pile but in actually there are 5 types of piles.

3. **Dry Piles:** In this type of piles the patients feels too much irritation and itching in outer anal area with or without pain.
4. **Wet Piles:** In this type of Hemorrhoids/Piles patient feels irritation intense pain and a fluid with very bad smell come out of the food pipe.
5. **Special type:** There is special type of Hemorrhoids/Piles which apparently show no sign of piles but bleeding continuous due to wounds or Ulcer in the food pipe. This type of piles has no successful treatment in medical science till now. I have seen the patients dying in the big hospital due to this problem.

Treatment

In my country many people are providing many medicines for the problem of Hemorrhoids/Piles even free of cost. Those are effective at initial stages. The doctors advise the patients of piles to

1. Eat high fiber food i.e. eat more fruits, vegetables and whole grains. It will soften your stool and problem will reduce. It also solves the gas problem of the body.
2. Keeps your anal area clean.
3. Apply cold-ice packs on your anus to relieve swelling.
4. Apply cream contains hydrocortisone as an ingredient.
5. Take oral pain reliever: - some pain killer like Aspirin, Ibuprofen and so on to get relief temporarily.

Medicines for Hemorrhoids/Piles: The most of Piles/Hemorrhoids medicines contain hydrocortisone and witch hazel which can be used as reliever of pain and itching.

Doctor also say your specialist doctors if you do not get relief within seven days.

Doctors do a few Non-Surgical Treatments

The prevailing Non-Surgical Treatments are:

1. Removal of hemorrhoids by rubber band ligation method. In this an elastic band placed on the base of hemorrhoids to cut off the supply of blood. The Hemorrhoids will either shrink or fall off. It may occur again.
2. Injection: - A solution is injected into the internal hemorrhoids. With this supply of blood is cut off and hemorrhoids automatically gets removed.
3. Infrared and photocoagulation are two other options.

Surgical Treatment

As per the medical science this is the last option to get rid of Hemorrhoids/Piles. With this treatment all the hemorrhoids get removed completely by surgery. It also involves stapling. In this the concerned hemorrhoids are tacked back in to the place. It is done under general anesthesia.

Conclusion

From above mentioned details it is clear that these treatments cure the patients of hemorrhoids/Piles, when this problem is at initial stage. There is no medicine which authentically says that this medicine will provide 100% relief to every patient who suffers from Hemorrhoids/Piles. This problem shows its existence again and again even after surgery. More over surgery is too much expansive and every person cannot afford it. As a result the problem of those poor patients

goes on from bad to worse to worst. Ultimately the problem of Hemorrhoids /Piles many times it gets converted into Colorectal/ Bowel Cancer and patient moves toward sure death. On Google trends of 2012 about 47,000 to 50,000 deaths in U.S. took place only due to Colorectal Cancer/Bowel Cancer ,this was probably due to start of ignorance in the cases of rectal bleeding.

Symptoms of Bowel Cancer

1. Bleeding from bottom or blood in stool.
2. Abdominal Pain or Lumps.
3. Persistent change in the bowel habit including constipation and diarrhea.
4. Unexplained weight loss.
5. Unexplained tiredness, dizziness or breathlessness.

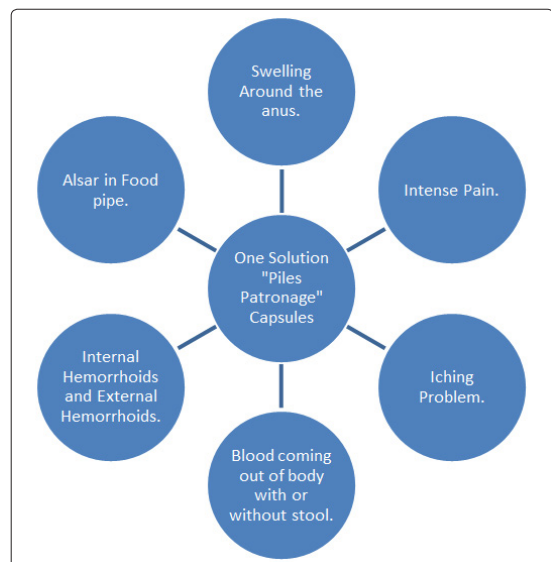

Treatments Colorectal/Bowel Cancer are

1. Surgery.
2. Radiation.
3. Chemotherapy.

Even after these highly expensive treatments number of deaths is so large. Then what is the purpose of these treatments? No one can say authentically that the patient will be cured after taking these treatments. The word "may be/might be" must not be there, but the word "must be cured" should come in to the practice that is in the medical field.

About My Invention

I am the Managing Director of a Pharmaceutical Company "Paul Patronage". We have invented a medicine in year 1992 with advanced formula and tested over several patients through doctors, direct contacts and in Medical camps organized in our country. This medicine cures all types of Piles/Hemorrhoids at every stage with 100% guarantee we have named it as cap "Piles Patronage" (Figure).

As Diagram Shows we have invented an advanced formula which don't have any side effect and gives 100% effective results. It cures Hemorrhoids so effectively and prevent patient to go towards cancer. The use of these capsules is very easy. Two capsule should be taken with simple water twice in a day. It will cure 70-90% of the problem. The result will be clearly visible after 72 hours after that two capsules daily should be taken regularly till all the hemorrhoids

get removed. Those hemorrhoids dried up and disappear through this course of medicine. Once patient get cured completely the problem will not occur again and again if they maintain few precautions. This medicine is very cheap as compare to all other expensive surgeries and medicines. Every person can afford it easily.

The precautions that patients will have to keep are

1. No use of excess wine or any other intoxicated material.
2. No unnatural sex.
3. No use of red chilly during the course of medicine.

Special Declaration

I am glad to declare that all my patients of Hemorrhoid/piles suffering from any type of Piles and even at chronic stage would get 100% relief. I also declare it that after use of my medicine there will be no new patient of Colorectal/Bowel Cancer. I am very much hopeful that my medicine will cure Colorectal/bowel Cancer and there will be no need of Chemotherapy, Radiation method or surgery. I am so much hope full in this case because the symptoms of both Piles and Colorectal/Bowel Cancer are similar and I have treated a large number of chronic undeclared patients of Colorectal/Bowel Cancer. I shall make declaration in this regard after treating and curing the declared patients of colorectal/Bowel Cancer with my invented medicine.

One experience I had

I have treated a very large number of patients. There was not even a single patient uncured after getting our medicine. I would like to discuss the case of one chronic patient. It is the matter of year 2005. I was in search of a shop, so I went to a property dealer. He was wearing a shirt and towel wrapped on his lower portion. I asked

him why he was sitting on the chair with a towel wrapped. He told me that he cannot wear any cloth on his lower part of body due to continue bleeding problem. He could not step out from his shop and house from past 8 years. Even after the surgery his bleeding problem was there. I gave him my visiting card and asked him to meet me. He refused to come to me and said he cannot come to me due to continue bleeding and more over he had lost faith because he had taken so many medicines with no positive results.

I went to his place for second time and gave him two capsules of "piles patronage" with water. He took two capsules in my presence. I told him that he should inform me about the results after 72 hours. Surprisingly he came to me and he was so happy on that day that I cannot describe his happiness in words. He told me he has visited anywhere out of his shop/house after eight years. His problem was reduced to a large extent. I gave him medicine for one month. He took medicine for 15 days more and was fully cured.

I can say that no patient at the stage of cancer or bowel cancer came to me till date. All my patients get cured at early and chronic stages. I did not treat any cancer/bowel cancer patient, but I am very much hopeful that this medicine will cure the patients of cancer/bowel cancer too because all the symptoms of bowel cancer and Piles/Hemorrhoids resembles to each other.

Acknowledgement

It is my heartiest desire that this invented advanced formula/ Medicine should reach in every corner of the world. Its use should be maximized so that the world may become Hemorrhoids/Piles and colorectal/Bowel Cancer free.
