Abstract

The article presents the materials of a new study devoted to the reflection in the means of philately, data on the provision of emergency and first aid to wounded and injured patients, intensive therapy and pulmonary cardiac resuscitation. The article is illustrated with images of postage stamps, artistic stamped envelopes, their description and additional information to them are given.

Keywords: Resuscitation, Intensive Therapy; Heart Massage; Artificial Respiration; First Aid and Medical Aid; Philately.

Introduction

Among the numerous types of medical activities, the provision of pre-medical and first aid to injured and injured patients is extremely important, since the ability to provide this type of assistance, in the first minutes after an injury, in the vast majority of cases, often allows you to save a person's life! The ability to stop bleeding, impose a bandage and conduct immobilization of the injured limb, to carry out an eye-hearted reanimation - these practical skills whose skillful execution belongs to the number of mandatory police officers, fire service, paramedics, drivers, as well as for many ordinary people who have witnessed Accident, until the moment until the medical and / or special team of ambulance arrives, and the patient will not be delivered to the hospital. Also, the medical staff working in the department of intensive medical care and the resuscitation department at a higher professional level is obliged to fight for the life of the greatest patients. World philately pays significant attention to these issues, releasing postal miniatures devoted to this problem.

Aim

Submit new data on the victims of victims and wounded first prefigure, medical care, intensive care and intensive therapy, with the help of various means of philately.

Materials and Methods

When conducting this research work, we used a method of in-depth literary and critical analysis of available scientific sources of information on the issue under study, using reference books, encyclopedias, catalogs, specialized periodicals, Internet resources.

Results and Discussion

There are postage stamps of different countries of the world, which illustrate intensive therapy to patients with different types of pathology, vital intensive therapy under the conditions of the intensive care unit, or in the wards of intensive hospital therapy, incl. and in patients with coronavirus infection, during the Pandemic period COVID-19. A small selection of such postage grades is presented in Fig. 1 [1, 4, 7, 12].

Figure 1: The Provision of Resuscitation and Conducting Intensive Therapy, In the Reflection of Philately

In order for the representatives of salvation services and ordinary categories of citizens to be able to conduct a cardiovascular resuscitation, using artificial respiration and a closed heart massage, it is necessary to conduct their qualified training, involving the training process of highly qualified specialists, from

among experienced health workers and / or specifically Trained instructors who have significant practical experience. A selection of philatelic materials from different countries of the world dedicated to the learning process of light-cardiac resuscitation is presented in Fig. 2 [2, 3, 5, 9, 11, 12].

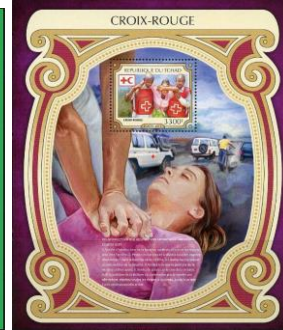

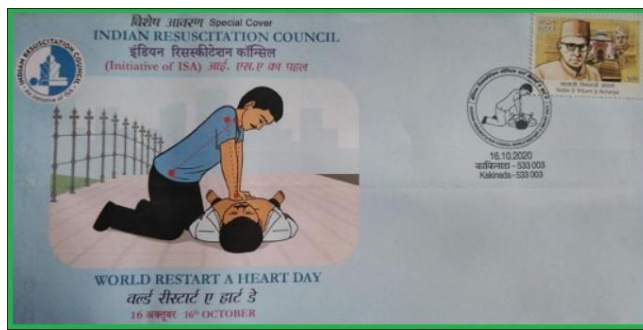

Figure 2. Learning The Technique of a Closed Massage of The Heart and Artificial Respiration

The ability to properly dress up, stop the bleeding, carry out the immobilization of the damaged limb, also, boldly, can be attributed to the vital practical skills to provide emergency and urgent preference to which everything must be owned, without

exception, representatives of the rescue service, as well as many categories of citizens of different age groups. Philatelic materials devoted to this issue are presented in Fig. 3 [2, 3, 5, 7, 9, 11, 12].

Figure 3: Dressing And Immobilization on Postage Stamps

In fig. 4, presented, in the obverse and reverse, a small selection of commemorative, silver and bronze medals dedicated to the light-hearth resuscitation of patients in a critical condition [6, 10, 12].

Figure 4. A Selection of Commemorative Medals Dedicated to Light-Hearted Resuscitation

A separate selection, in Fig. 5, presents commemorative badges dedicated to resuscitation and intensive care [12].

Figure 5. Commemorative badges dedicated to resuscitation and intensive care

This completed an article on providing patients with resuscitation activities, first medical and emergency medical care.

Conclusion

The article presents new college materials on reflection in the means of global philately, materials on the provision of injured and affected, resuscitation actions, carrying out intensive therapy and the provision of first aid.

The presented illustrative materials can be used as an auxiliary informative means when studying such disciplines as "medicine of urgent states", "Resuscitation and intensive therapy" and "History of Medicine", in profile universities and departments.

Modern collectibles, in all their diversity, quite fully, brightly and creatively, reflect the issues of intensive therapy, resuscitation, first, urgent and prefigure medical care.

Conflict of Interest

The author notes the complete absence of any conflicts of interest.
