Abstract

There are several articles in the literature after the COVID-19 pandemic showing the necessity of vaccinating people who have a cancer diagnosis to prevent this disease in this group of patients. But what I want to report in this article is that I am facing an increasing number of cases of patients with cancer after receiving COVID-19 vaccines and this is what I want to describe in this study, using the thoughts of Hippocrates (460 bce - 375 bce), the father of medicine, that said that "it is more important to consider other ancient medical traditions prior to the knowledge we have nowadays".

The purpose of this study is to demonstrate that there are cases of patients with cancer diagnosed after receiving two, three or four doses of the COVID-19 vaccine and I will describe which are the risk factors that these patients are having in the energy level that could induce more propensity to have cancer when using this kind of vaccine.

Methods: Five case reports of 71, 40, 76, 55, and 75 years old with diagnoses of colon cancer, breast cancer, skin cancer, and gastric cancer in the last two patients respectively days and months after receiving the second, third and fourth doses of the COVID-19 vaccine.

Results: The five patients had in common an energy deficiency inside the five internal massive organs (Liver, Heart, Spleen, Lungs, and Kidney) according to the Five Elements theory of traditional Chinese medicine. According to this theory, all disease comes from the energy alterations between these five organs and cancer comes from energy deficiency inside these organs and the formation of internal Fire. The use of any kind of highly concentrated medication or highly concentrated vaccine would reduce even more these energies, according to Arndt-Schultz-Law, created in 1888 by two German researchers, and could reduce this vital energy, which was proven very low in all these patients reported, increasing the chance to have cancer.

The conclusion of this study is that patients that are developing cancer after receiving the COVID-19 vaccine have in common, energy deficiency inside the five internal massive organs (and these alterations are the factors to induce cancer formation according to traditional Chinese medicine) and the use of this kind of vaccine has the potential to reduce even more the vital energy of the patient which is already very low and leading to a weakness state of the immune system and increasing the chance to have any kind of chronic diseases, in this case, cancer.

Keywords: COVID-19 Vaccine, Cancer, Energy, Traditional Chinese Medicine, Homeopathy, Hippocrates.

Introduction

There are some articles in the literature showing an increasingly exacerbated and higher mortality in patients with cancer to acquire COVID-19. In the majority of them, they are recommending the COVID-19 vaccine to reduce this kind of problem in this group of patients but there are some limitations in these studies because they do not show the efficacy of these vaccines in immune-compromised patients [1].

But recently, I have noticed that there were an increasing number of patients with cancer diagnosed after the global vaccination for COVID-19 prevention [2, 3].

Purpose

The purpose of this study is to demonstrate what could be the risk factors inducing or aggravating cancer formation after receiving the COVID-19 vaccine mainly to show the energy alterations inside the five internal massive organs (Liver, Heart, Spleen, Lungs, and Kidney) and the other factors including diet, emotions, family history of cancer. This study was based on five case reports that developed cancer after receiving two, three, or four doses of the highly concentrated injected vaccine for the prevention of COVID-19. All five patients gave the authorization and consent to publish their histories in this article.

Methods

Through five case reports, the first one is a 71-year-old female

patient with a diagnosis of colon cancer 72 days after receiving the second dose of the COVID-19 vaccine (Pfizer), the second patient is 40 years-old with breast cancer developed after 7 days after the third dose of Pfizer vaccine, the third one is a 76 years old with a diagnosis of skin cancer after receiving the fourth dose of COVID-19 vaccine (Janssen), the fourth patient is a 55 years-old female with a diagnosis of gastric cancer after receiving the fourth dose of COVID-19 vaccine (CoronaVac) and the fifth case is a male patient of 75 years-old with gastric cancer after 74 days of receiving the third dose of COVID-19 vaccine (AstraZeneca). I will describe their history in the next paragraphs.

Case report one

The first case report is a 71-year-old female patient with a history of abdominal pain since March 16th, 2022, two months after the second dose of the COVID-19 vaccine (Pfizer). According to her, she was walking on the street on March 16th, 2022, and she felt a deep pain in the right side of her abdomen that made her unable to continue to walk. She associates the pain with some foods that she ingested very much such as Chia with jelly during that week. She took anti-inflammatory medications at that time such as Tandrifax (Caffeine, Carisoprodol, Diclofenac, Acetaminophen, Paracetamol, and Diclofenac Sodium) and the pain went away and she calmed down but at the moment the medication lost the effect, the pain returned again. She felt a lot of cramps, the feces were coming out more difficult, she could not squat because her abdomen was hurting too much, and she stopped to eat everything and just cried. She started to lose her appetite, continued to feel colic, did not want to eat much and everything did not go well for her. She stopped to eat everything she used to like and started to get sick and lose weight, about three kilos in the beginning.

The patient took the first dose of the COVID-19 vaccine on March 29th, 2021 (CoronaVac). The second dose was on January 4th, 2022 (Pfizer).

She performed her first colonoscopy on March 23rd, 2022 and the doctor found only diverticula on that exam but the doctor did not tell her the results of this exam and told her that she needed to be submitted for surgery.

She did not trust the examination performed by the first doctor so she went to be evaluated by a second physician, performing a second colonoscopy on April 1st, 2022, that diagnosed a tumor in the large intestine.

At this time, she went to my clinic to do some acupuncture sessions and I asked her to come to do this acupuncture every day, to check on the possibility of reducing her tumor and improving her quality of life until she began the chemotherapy sessions.

She also performed the measurement of the energy of the five internal massive organs through the radiesthesia procedure.

Results

All her internal massive organs' energy was at the lowest level of energy, rated one out of eight. It was orientated to her to avoid

the ingestion of raw food, Coldwater, sweets, and dairy products to not imbalance, even more, the energy of the Spleen and pancreas (fifth chakra according to Ayurvedic medicine). It was also orientated to her to avoid the ingestion of fried foods, melted cheese, chocolate, honey, coconut, eggs, and alcoholic beverages to not produce internal Heat, one of the energy imbalances responsible for cancer production, according to traditional Chinese medicine. It was also advised to her to avoid the ingestion of coffee, soda, and matte tea because all these drinks can reduce the vital energy of the Kidney and reduce the production of *Yin* and *Yang*, and all Kidneys functions, one of them is the production of the *Zheng-Qi*, which is one of the energies to protect the body against the invasion of external pathogenic factors.

During the period when she was in acupuncture therapy associated with apex ear bloodletting, her abdominal pain had subsided and she began to release her stools easily without pain.

She began to use highly diluted medications such as homeopathic medications according to the theory of written by myself whose title is *Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine* and crystal-based medications. These medications used in this treatment will be shown in the discussion section.

On April 2022, she went to an oncologist and he said that the alterations in the large intestine shown in the colonoscopy were colon cancer and it had approximately three months old (approximately the time she took the second dose of the COVID-19 vaccine) and it was not aggressive. He said it was common cancer and could resolve with six chemotherapy sessions.

She began her chemotherapy sessions on May 23rd, 2022, and did not feel anything bad in the first session. But after the second chemotherapy on June 6th, 2022, she begins to feel drowsiness, tremors, and lack of appetite. On the third chemotherapy, she began to feel hair loss, lip damage, and a mouth totally rough in addition to maintaining the same symptoms of drowsiness, tremors, and lack of appetite.

She performed chemotherapy on days June 20th, July 4th, July 18th, August 1st, August 8th, and August 22nd.

But as she was using acupuncture and intaking homeopathy medications, she was not presenting major side effects presented by other patients, when receiving chemotherapy. She had a neighbor that was in colon cancer treatment, the same diagnosis that she had. This neighbor was presenting severe side effects of chemotherapy treatment because she was using only the chemotherapy and not receiving the treatment using Chinese medicines tools so I will discuss the different outcomes of the patients when receiving treatment only for the treatment of the "leaves" (using chemotherapy) and using treatment to treat the whole tree (including the "leaves" and the "root" of the tree).

She performed the third colonoscopy on August 17th, 2022 which revealed that the tumor, which had the size of an orange, disappeared completely only doing Chinese medicine's tools (such as Chinese dietary counseling, auricular acupuncture with apex

ear bloodletting and systemic acupuncture, and replenishing the internal five massive organs using highly diluted medications according to the theory *Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine*) and the doctor was trying to find the localization of the tumor because he did a tattoo in the tumor, but he did not find the tattoo at the colonoscopy.

The patient is still in acupuncture treatment every day and continues to follow Chinese dietary counseling.

The doctor indicated doing the surgery through video laparoscopy and she took out part of the large intestine. The result of the pathology exam confirms the diagnosis of colon cancer.

The tomography and the study of the bones through the computed tomography showed that she also has a nodule in the Liver but no metastasis in the bone.

This patient was suffering from emotional problems because she has two sons and her youngest son was in a separation phase for two years, just before the pandemic. The effects of these emotional problems on the development of this cancer I will discuss in the discussion section.

The dates of COVID-19 vaccine was: first dose- March 29th, 2021(CoronaVac), second dose- January 4th, 2022 (Pfizer).

Case report two

The second case report was a 42-year-old female patient, who works with law and administration in the Forum of the city Franca. She was the first daughter of her parents and was born by cesarean section. She was married since 2008 (14 years ago), with no kids.

On July 2022, she felt a lump in her right breast when she was taking bath and felt a little soreness.

In the beginning, it was about 2 centimeters and she was not worried because she thought it was an inflamed mamma because on April 2022, she had all gynecology exams up to date such as an ultrasound, and mammography, and everything was normal at that time.

She went to a gynecologist that asked for an ultrasound of the mammary glands. The doctor told her that he did not like the image of the mammary gland and asked for a biopsy. At that moment, she started to worry and she was submitted to a biopsy and the result came out in one week. The result was triple negative breast cancer, which means that in her case, the origin of the cancer was not hormonal and they tested for several hormonal factors and in her case, all her factors were triple negative. The doctors did not say what was the cause that induced breast cancer formation. She had a past history of thyroid cancer in 2014, 8 years before this breast cancer and at that time, she needed to do surgery, to remove the gland and began to replace the thyroid hormones.

Her breast cancer was in the right breast and since her marriage, she was able to be pregnant with three babies but in all these three times, she had three miscarriages, that lasted a maximum of six weeks.

Her husband has a genetic change that increased the chance to have chromosomal inversion. They did the karyotype and she cannot remember which chromosome has an inversion. For this reason, the doctor said that she could not become pregnant.

She likes to eat cheese but does not like to drink cow's milk. She likes to eat raw salad and fruits such as citrus fruits. She likes to eat more salt, bitter and sour taste food instead of sweet food. She took the first COVID-19 vaccine on July 9th, 2021 (Janssen).

On December 2nd, 2021, she took the second dose of the COVID-19 vaccine (Pfizer).

And on June 27th, 2022, she took the third dose of the COVID-19 vaccine (Pfizer), 7 days before discovering the lump in the right breast.

The medications that she is using are hormone replacement of thyroid and vitamin D because she did not take enough sun. After receiving the breast cancer diagnosis, she used Clonazepam, 5 drops per day and used for 2 weeks and stopped.

One week before her first chemotherapy on September 2022, she went to my clinic, to perform the measurement of the energy of her five internal massive organs (Liver, Heart, Spleen, Lungs, and Kidney) and to do some acupuncture sessions.

Results of case report two

All her internal massive organs' energy was at the lowest level, rated one out of eight. The treatment of this condition includes Chinese dietary counseling orientating her to avoid the same foods that the case report one received and also, she performed auricular acupuncture with apex ear bloodletting and systemic acupuncture. It was also prescribed homeopathy medications according to the theory of *Constitutional Homeopathy of the Five Elements based on Traditional Chinese Medicine* and crystal-based medications and I will explain these medications in the discussion section.

In her case, after the first acupuncture session, the patient returned to do the second acupuncture session and the breast tumor reduced very much (from ten to seven centimeters) and after the second acupuncture session, the tumor reduced to only one-third of the initial size.

The oncologist had prescribed the first chemotherapy session after her third acupuncture session and after this first chemotherapy, she did not return to the fourth acupuncture session because she was feeling very weak and could not walk.

But after this, she went to my clinic and told me about her weak state after chemotherapy and I performed moxibustion to increase her vital energy.

Nowadays, she still doing chemotherapy but her breast tumor has 1 centimeter in the last ultrasound (December 2022).

Case report three

She is a 76 years-old female patient with a history of having skin cancer diagnosed on May 2022, after receiving the fourth dose of the COVID-19 vaccine (Janssen). She said that she had a lesion on the right part of the right nostril as if it was a dark lesion, just like the lesion she had on both arms. After taking the first dose of the COVID-19 vaccine (CoronaVac-March 23rd,2021), the patient began scaling from the site of this injury. The second dose of the COVID-19 vaccine was on April 20th,2021(CoronaVac) and the third dose was on October 20th,2021(Pfizer), the fourth dose was on April 5th,2022 (Janssen) culminating in a biopsy in April 2022 that provided the presence of a malignant skin cancer. In the surgical act, a skin graft was performed to cover the area that was removed of skin to remove the lesion.

She was my patient in 2021 when she had low back pain and was using anti-inflammatory medications prescribed by an orthopedic doctor with no improvement of her condition only using these medications. She went to my clinic and I measured her internal massive organs energy at that time (2021). On April 2022, she returned to France and stayed there for months and returned on August 2022, due to winter in Europe. Her husband was from France and they returned to Brazil to stay here due to the good climate and many suns.

Results of case report three

All her internal massive organ energy (Liver, Heart, Spleen, Lungs, and Kidney) were at the lowest level of energy, rated one out of eight and she started treatment using Chinese dietary counseling, auricular acupuncture with apex ear bloodletting and systemic acupuncture. At that time, she began to replenish her internal massive organs energy using homeopathy medications according to the theory of *Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine* and crystal-based medications but she uses the medication only for one month and stopped the use (normally the patient needs to use the homeopathy medications for the whole life because the cause of these energy deficiencies is the influences of the electromagnetic radiation of the 4G and 5G technology of the modernization of telecommunication). She was also orientated to avoid the ingestion of the same foods reported in previous cases, in order not to imbalance the energy of the five internal massive organs and cause worsening of their condition. She was also submitted to the treatment with auricular acupuncture with apex ear bloodletting to take out the internal Heat, which it is one of the causes of cancer formation according to traditional Chinese medicine.

She was orientated now to intake the highly diluted medications for her whole life to increase her internal organs' energy and reduce the chance to have another malignant tumor in the body.

Case report four

I.C.M.O., 55 years old, in December 2021 was submitted to meningioma surgery (she had strong pain in the left head, and discovered that there was a benign tumor behind her left eye). The

symptoms that she was presenting at that time were headache (February 2021), strabismus of the left eye, and blurry vision. She went to an ophthalmologist that asked for a magnetic resonance and the diagnosis of Meningioma was done.

When she went to surgery, her hemoglobin was 11 mg/dl but after the surgery, she did not receive a transfusion because of religious reasons. She was a Jehovah's Witness. After the surgery (in the mid of March 2022), the doctors allowed her to eat and she started to eat, and she could not hold the food in her stomach. She was submitted to an endoscopy that revealed that she had a malignant gastric tumor and a little reflux. At this time, her daughter that was my patient told me about her mother and I asked her to go to my clinic to measure the energy of the five internal massive organs (Liver, Heart, Spleen, Lungs, and Kidney) through the radiesthesia procedure.

Results

All her internal five massive organs were in the lowest level of energy, rated one out of eight. She was orientated to avoid the ingestion of dairy products, raw foods, Coldwater, and sweets to tone the energy of the Spleen (fifth chakra), responsible for the absorption of nutrients and formation of Blood. The second group of foods that I orientate was to avoid the ingestion of soft drinks, mate tea, and coffee to avoid worsening the energy of the Kidney, responsible for the production of *Yin* and *Yang* energy. And the third and last group of foods that I orientate to avoid was the ingestion of fried foods, eggs, honey, coconut, alcoholic beverages, and melted cheese to avoid the formation of more internal Fire, one of the energy imbalances responsible for the formation of cancer, according to traditional Chinese medicine. She was also orientated to use highly diluted medications to tone the energy of all these five internal massive organs using Phosphorus to tone the Liver, Sulphur to tone the Heart, Calcarea Carbonica to tone the Spleen, Silicea to tone the Lungs, Natrum muriaticum to tone the Kidney. All these medications were according to the theory created by me (2020) titled *Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine*. It was also prescribed to her the use some quantic medications called Anemona, a corrector anergic to increase Blood production, and also, the use of homeopathy medication called Carcinosinum 200CH, to treat this phase of cancer development considered the last phase of disease formation. She was also submitted to auricular acupuncture with apex ear bloodletting twice a week to tone the energy of the five elements and take out the internal Fire. She returned to Clinic's Hospital in Ribeirão Preto to do more exams and what they revealed was that her anemia was worsening to 3,9 mg/dl. According to her daughter, all the things were happening very fast. She was admitted to the hospital due to this severe anemia and the doctors told the daughter that the only thing to do was transfusion but the patient still refused the process. After, they claimed another group of doctors to evaluate the patient and they suggest to do an embolization of the artery that was bleeding in her stomach, and she became better, the bleeding process stopped with this procedure. The doctors that were treating her became very impressed with her improvement because they thought she would die. Her heart rate was 68 beats per minute and suddenly went to 120 beats per minute. Her saturation was normal and everything

was normal. She started to receive a pasty diet and vitamin B12 every day. Her hemoglobin went to 5,9. The plan of the doctors for her was to do chemotherapy with radiotherapy, or only chemotherapy before doing surgery, and after surgery, doing only chemotherapy. But they said that if they do the surgery in her actual condition, the patient would die and for this reason, they decided not to do the surgery at the first moment. They prescribed her Noripurum and Eritropoetin and the family also gave the Chinese herbal therapy to increase Blood production called Ba Jen Tang (I orientate them to send this medication to a homeopathy pharmacy to transform into homeopathy medication to not worse, even more, the energy of this patient which was already very low) and also, associated the quantum medication called Anemona to increase the energy of the Spleen, to increase Blood production. After some weeks, they performed the total gastrectomy and the patient is receiving chemotherapy due to possibly having some malignant cells in the organ that was together with the stomach that they could not take entirely. Nowadays, she is having quite a normal blood count in the laboratory exams but is still in treatment using all the medications to replenish the energy of these organs to increase the immune system and do not have complications when using chemotherapy and have more power to combat the malignant cells and prevent the formation of another cancer or formation of metastasis.

The dates of her vaccination for the prevention of COVID-19 were: the first dose on August 14th, 2021 (CoronaVac); the second dose was on September 11th, 2021 (CoronaVac); the third dose was on February 4th, 2022 (Pfizer); the fourth dose was on June 29th, 2022 (CoronaVac).

Case report five

It is a 75-year-old male patient with a history of weight loss since July 2022, about 7 kilos or more and it was presenting jaundice. These symptoms began 5 months after receiving the fourth dose of the COVID-19 vaccine (April 2nd, 2022- Astra-Zeneca). The suspicion was that the problem could be in the Liver because he was using medications to treat Alzheimer's disease. He was hospitalized for one week and they did a stomach biopsy that revealed that it was a malignant gastric tumor with liver metastasis. He is of Italian downward and has a history of gastric cancer in his family. He has seven children and worked in the countryside when their children were young but after, they moved to the city and he began to work as a security guard in a shoe fabric during the night for eight years. He went to my clinic because his daughter was my patient and told me about her father's health situation. I asked her to bring him to measure the energy of the five internal massive organs (Liver, Heart, Spleen, Lungs, and Kidney) using the radiesthesia procedure.

Results

What I found was all his internal five massive organs (Liver, Heart, Spleen, Lungs, and Kidney) were in the lowest level of energy, rated one out of eight. I began to treat his condition using auricular acupuncture with apex ear bloodletting and systemic acupuncture. It was also orientated to him to follow Chinese dietary counseling avoiding some specific foods such as dairy products, raw food, Coldwater, and sweets, and the other foods orientated in case report four to not have energy alterations in

the five internal massive organs caused by wrong eating habits. It was prescribed to use highly diluted medications to replenish the energy of the five internal massive organs using homeopathy according to the theory written by myself (2020) whose title is *Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine* and crystal-based medications. The patient began to do chemotherapy on October 27th, 2022 and what I know from the last message from his daughter is that he was very weak at the end of the year (in December 2022), probably due to chemotherapy sessions and I orientate her to give the homeopathy medications more frequently at 200 CH, each week, instead of giving each month, to increase the vital energy, that was already very low, before the chemotherapy sessions.

The first dose of the COVID-19 vaccine was done on March 22nd, 2021(CoronaVac). The second dose of the COVID-19 vaccine was on April 19th, 2021 (CoronaVac). The third dose of the COVID-19 vaccine was on October 27th, 2021 (Pfizer). And the fourth dose of the COVID-19 vaccine was on April 2nd, 2022 (Astra Zeneca).

Discussion

This article will be written following Hippocrates' (460 BCE - 375 BCE) oath, which said that "it is important to consider other ancient medical traditions prior to the knowledge we have nowadays". In another quote of his, he said that "foolish the doctor who despises the knowledge acquired by the ancients". For this reason, I will combine the reasoning used by traditional Chinese medicine, one of the oldest medicines to explain the subject of the development of cancer after the COVID-19 vaccine and demonstrate which are the factors involved in this condition from the energy point of view [4].

In the webinar Scientific Wisdom Webinar on Natural & Alternative Medicine Therapies, which was held on September 17, 2022, I presented a study entitled *What Is the Difference When We Treat Only The "Tip of The Iceberg and Not Treat the Remaining Part "Under the Ocean"?* In this study, I showed that all clinical manifestations presented by the patient with COVID-19 are only reflections of energy imbalances presented by the patient prior to this infection and could worsen the evolution depending on the type of medications used to treat this infection [5].

In the research, I performed in Brazil analyzing 1000 patients' internal massive organs energy I concluded that 90% of all my patients studied from 2015 to April 2020 were in the lowest level of energy, independent of the type of diagnosis or the age group. This means that quite all patients that I am attending in Brazil are not considered immune competent but they are very immune compromised due to this reduced energy in all these internal five massive organs, that are responsible for the production of internal energy to allow us to survive with health. The reduction of these energies (*Yin, Yang, Qi, and Blood*) will lead to the formation of many kinds of diseases at the "tip of the iceberg" or in the "leaves" of the tree, as two metaphors I usually do in all my articles to explain the main differential diagnosis and treatment made by Western medicine and by traditional Chinese medicine that exist for more than 5000 years, considered the oldest medicine until today. You can see the metaphor of the iceberg (Fig-

ure 1) and the metaphor of the tree (Figure 2) to compare the different viewpoints between Western and Traditional Chinese Medicine [6, 7].

Figure 1: Tip of the iceberg

But what I found in the research studying and analyzing 1000 patients’ energy of the five internal massive organs was that there are external factors that contribute to reducing the energy of these organs, that are the influences of electromagnetic radiation from chronic exposition to 4G and 5G, reducing the energy of all these organs, weakening the energy in the “root of this tree” [7, 9].

All this reasoning began in 2006 when I treated one specific patient that was complaining of leg pain for 6 months with no improvement only using anti-inflammatory medications. When he went to my clinic, I treated his energy imbalances presented in the “root” of the tree (Kidney *Yang* deficiency) and all his symptoms improved at the same time, including glaucoma, which I was not aware that he had. And for the first time in his life, he could reduce his intra-ocular pressure, which was always above 40 mmHg, to 17 mmHg [10].

After this case, I started to participate in many conferences worldwide to show the importance of treating the “root” of all kinds of diseases (that are normally invisible by the naked eye) and not just treating the symptoms, at the “leaf” of the tree (shown in Figure 2) or only on the “tip of the iceberg”, shown in Figure 1 [6, 10].

At the “root” of the tree, there are two theories in traditional Chinese medicine that rule all the functioning of the human body, the *Yin* and *Yang* and the Five Elements Theory [6].

These theories were described in the past history of Chinese medicine and they are the cornerstone of all treatments in Chinese medicine’s thoughts. The aim is to achieve a balanced state between *Yin* and *Yang*, as we can see in all natural movements such as day and night, sun and moon, summer and winter, man and woman, etc [11].

Yin and *Yang* are two opposite but complementary forces that exist in our universe and you can see the symbol that represents them in Figure 3 [8].

Figure 2: The metaphor of the tree compares the different levels of diagnosis and treatment between Western and traditional Chinese medicine, showing the “leaf level” and the “root level”.

In Figures 1 and 2, you can see that the “tip of the iceberg” and the “leaves of the tree” are the only symptoms presented by the patient. In this case, all kinds of disease diagnoses and treatments in Western medicine, including cancer are treated at the “tip of the iceberg” and on the “leaves” of the tree [8].

But traditional Chinese medicine understands that the cause of all clinical manifestations of the patient is not on the “leaf” level or at the “tip of the iceberg” but on the “root” of the tree or under the water line of the iceberg, shown in Figure 1 and 2. It can also be caused by the influences of the external pathogenic factor such as the entrance of Cold, Wind, Heat, Humidity, and Dryness that can enter a weak body and induce the formation of many infectious and non-infectious diseases at the “leaf” level. The factors that can trigger the energy imbalances in the “root” of the tree or in the part of the iceberg “under the water line”, are emotional factors and wrong eating habits [6].

Figure 3: *Yin* and *Yang* symbol.

The imbalances between them can generate many kinds of diseases in the “leaf” level of the tree, as you can see in Figure 4. [12, 13]

Figure 4: Many kinds of energy imbalances between *Yin* and *Yang* energy.

For you to understand, when there is a *Yin* deficiency in relation to *Yang*, the patient feels hotter sensations such as women in menopause. But this same energy imbalance can be the cause of diabetes formation and all auto-immune diseases at the “leaf” level. So, according to traditional Chinese medicine, many diseases can come from the same energy imbalances, and the same disease can come from different energy imbalances [14].

The second theory presented at the "root" of the tree is the Five Elements theory. In this theory, there are five elements and each one has its own emotional characteristics and is responsible

for many functions in the body. They correspond to Fire, Earth, Metal, Water, and Wood and each element has its own representation inside the body. The Fire element corresponds to Heart, the Earth element corresponds to Spleen, the Metal element corresponds to the Lungs, the Water element corresponds to the Kidneys, the Wood element corresponds to the Liver. Each organ is interconnected by the following element through the Generation cycle and each element can control the other element functioning through the Control cycle, as you can see in Figure 5 [11].

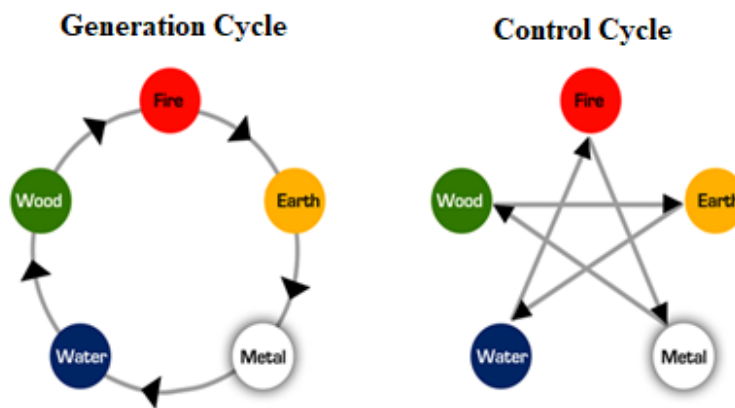

Figure 5: Generation Cycle and Control cycle.

Each internal massive organ is responsible for the functioning of one external sensorial organ, as you can see in Table 1 [3].

Table 1: One element corresponds to one internal massive organ, which is responsible for one external sensorial organ.

	Wood	Fire	Earth	Metal	Water
Orientation	East	South	Middle	West	North
Season	Spring	Summer	Late Summer	Autumn	Winter
Climate	Wind	Summer Heat	Dampness	Dryness	Cold
Cultivation	Germinate	Grow	Transform	Reap	Store
Yin organ	Liver	Heart	Spleen	Lung	Kidney
Yang Organ	Gall Bladder	Small Intestine	Stomach	Large Intestine	Bladder
Orifice	Eye	Tongue	Mouth	Nose	Ear
Tissues	Tendons	Vessels	Muscles	Skin & Hair	Bones
Emotions	Anger	Joy	Pensiveness	Grief	Fear
Colors	Blue/Green	Red	Yellow	White	Black
Taste	Sour	Bitter	Sweet	Pungent	Salty
Voice	Shout	Laugh	Sing	Cry	Groan

In the case of each internal massive organ, they are responsible for the production of one specific energy to keep the health of the patient, and when there is a disruption in this balanced state, there is the formation of diseases, manifested at the “leaf” level of the tree or in the “tip of the iceberg”, shown in Figure 1 and 2 [8].

The measurement of these energies inside each organ is made in my clinical practice using a crystal pendulum in a procedure called radiesthesia. I measured the energy of the seven chakras’

energy centers studied by Ayurvedic medicine and each chakra corresponds to one internal massive organ according to traditional Chinese medicine. So, the correlation of each chakra energy center with the five internal massive organs was published by Chase (2018) in the article entitled *The Geometry of Emotions: Using Chakra Acupuncture and 5-Phase Theory to Describe Personality Archetypes for Clinical Use*. You can see the correlation of the chakras’ energy centers with the five internal massive organs and their internal energy that they are responsible for production in Figure 6 [8, 15].

Figure 6: Correlation between the chakras’ energy centers studied by Ayurvedic medicine with the five internal massive organs according to traditional Chinese medicine and their energy production.

I need to explain briefly the concepts in traditional Chinese medicine to you to understand the reasoning used in this article to correlate the influences of the COVID-19 vaccine in initiating or worsening the evolution of patients with cancer because all these alterations are in the energy level, invisible by the naked eye. For this reason, Western medicine cannot correlate the influences of this kind of vaccine because it is not studying the energy alterations that the patients are presenting nowadays with the energy alterations that these patients are presenting when submitted to COVID-19 vaccines injections [2, 3].

But in research that I did in my clinic in Brazil from 2015 to 2020, I studied 1000 patients’ chakras’ energy centers, measuring the energy of the five internal massive organs and what I concluded in this study was that 90% of all my patients were in the lowest level of energy, rated one out of eight. You can see these results in Table 2 and 3 [7].

Table 2: Results of research that I did in my clinic in Brazil showed that 90% of all my patients were in the lowest level of energy, independently of age group or type of diagnosis.

Ages Chakras	2-19	20-59	60-79
7	8	8	8
6	1	1	1
5	1	1	1
4	1	1	1
3	1	1	1
2	1	1	1
1	1	1	1
Total of Patients	26	170	86
Main Western diagnoses	Anxiety	Anxiety	Anxiety
	Depression	Headache	Knee pain
Main Oriental Diagnoses	<i>Yin/Yang</i>	<i>Yin</i>	<i>Yin</i>
	<i>Yin/Blood</i>	<i>Yin/Yang</i>	<i>Yin/Internal Heat</i>
			<i>Yin/Yang/Internal Heat</i>

The remaining 10% of the group had some energy inside some organs, as you can see in Table 3 [9].

Table 3: Results of the research show that the remaining 10% of the patients have some energy inside one or a combination of internal organs energy of the five internal massive organs.

Chakras Combinations	Number of patients	Percentage in group	Overall percentage
1 / 2 / 3 / 4	1	2,08 %	0,24 %
1 / 2 / 3 / 4 / 6 / 7	1	2,08 %	0,24 %
1 / 3 / 7	1	2,08 %	0,24 %
1 / 4 / 7	1	2,08 %	0,24 %
1 / 5 / 6 / 7	1	2,08 %	0,24 %
1 / 6 / 7	1	2,08 %	0,24 %
1 / 7	1	2,08 %	0,24 %
2 / 4 / 7	1	2,08 %	0,24 %
2 / 5 / 6 / 7	1	2,08 %	0,24 %
2 / 7	2	4,17 %	0,49 %
3 / 4 / 6 / 7	1	2,08 %	0,24 %
3 / 4 / 7	1	2,08 %	0,24 %
3 / 5 / 6 / 7	1	2,08 %	0,24 %
3 / 6 / 7	1	2,08 %	0,24 %
4 / 6 / 7	2	4,17 %	0,49 %
4 / 7	3	6,25 %	0,73 %
5	1	2,08 %	0,24 %
5 / 6 / 7	2	4,17 %	0,49 %
6	2	4,17 %	0,49 %
6 / 7	12	25,00 %	2,93 %
ST	1	2,08 %	0,24 %
ST / 1 / 2 / 3 / 4 / 5 / 6 / 7	2	4,17 %	0,49 %
ST / 1 / 2 / 3 / 4 / 7	1	2,08 %	0,24 %
ST / 1 / 2 / 4 / 7	1	2,08 %	0,24 %

ST / 4 / 5 / 6 / 7	1	2,08 %	0,24 %
ST / 7	1	2,08 %	0,24 %
Total	48	100 %	11,39 %

Number 1- Liver; Number 2-Kidney; Number 3- Heart; Number 4- Lungs; Number 5- Spleen; Number 6- Memory and concentration; Number 7- Spirituality.

These results were important to us to understand that the population that I am attending in my country Brazil, is very immune compromised even before the pandemic, as I am showing in the article *Are We Vaccinating Immunocompetent or Immunocompromised People for COVID-19?* [9].

These results could be a sample of what could have been happening around the whole globe because all these alterations were caused by the influences of electromagnetic radiation due to the modernization of telecommunication after the implementation of 4G, and 5G technology, altering the energy status of our population including babies, children, adolescents, young adults, and older patients [7].

All this introduction was necessary for you to understand that the whole process concerning the prevention of COVID-19 was not only the production of the vaccine itself but we need to know which type of population that we need to attend nowadays, that are very immune compromised due to these energy alterations, as I am saying in the article also written by me (2021) whose title is *the Population in the World the Same as in the Past?* [16].

According to WHO (2022), half of the population in this world received at least one dose of the COVID -19 vaccine and after this vaccination, the incidence of COVID-19 reduced and also, the number of deaths, according to the study written by Li et al. (2021) whose title is *The Effect of the COVID-19 Vaccine on Daily Cases and Deaths Based on Global Vaccine Data* [3].

But the aim of this article was not to say pros or against the COVID-19 vaccine but to show that this type of vaccine, when

given in an immune-compromised population, will cause a major drop in the vital energy of the population, which was already very low and cause more immune deficiency instead of improving the energy, due to the actual vaccine used by Western medicine, since the beginning of the vaccination in December 2021, was all considered highly concentrated vaccines [3, 17].

In the case of these five cases reported in this article, the first was a 71-year-old female patient that developed colon cancer 74 days after receiving the second dose of the COVID-19 vaccine on January 4th, 2022 (Pfizer). The first COVID-19 vaccine was done on March 29th, 2021 (CoronaVac) [3, 17].

This patient began to feel symptoms on March 16th, 2022, 74 days after receiving the second dose of the COVID-19 vaccine. She was submitted to the first colonoscopy on March 23rd, 2022, but only did the diagnosis with colon cancer on April 1st, 2022 [3, 17].

After this diagnosis on April 2022, she went to the oncologist and he confirmed that her diagnosis was cancer that was approximately three months old and not aggressive. If you add the days until the date of that medical appointment, the doctor said that the cancer has approximately 3 months old, quite the same date after the patient received the second dose of the COVID-19 vaccine until that date.

This patient received 8 chemotherapy sessions and did not have any major side effects. The only side effect she presented was constipation that was caused by Blood deficient, the diagnosis according to traditional Chinese medicine, and all physiopathol-

ogy of the formation of constipation was described in the article also written by myself (2021) titled *Energies Alterations and Chakras Energies Deficiencies in Patients with Chronic Constipation*. This constipation probably was caused by the use of chemotherapy which is considered a highly concentrated medication and caused a drop in energy, inducing the formation of internal Fire [18].

As all patients with a cancer diagnosis have energy deficiency and formation of internal Fire, this patient reported in case one also has energy deficiency inside the five internal massive organs prior to the pandemic, as I showed in the research that I did in my clinic, that 90% of all my patients were in the lowest level of energy, rated one out of eight, in all internal massive organs [2, 19].

She also has emotional factors influencing the formation of cancer in the colon. In her case, due to the process of separation of her youngest son, which began before the COVID-19 pandemic in 2020, it was lasting for more than 2 years of sadness. This emotional state can imbalance the energy of the Lung and the Lung has a hollow organ the Large intestine, as I showed in the article written by myself (2022) whose title is *Why Anti-Inflammatory Medications Are Not Recommended to Treat Headaches as a Manifestation of COVID-19?* and in another article also written by myself (2019) whose title is *Shoulder and Elbow Tendinitis as Initial Manifestation of Autoimmune Hepatitis* [20].

The emotions that can imbalance the internal massive organs are shown in Figure 8.

Figure 8: Emotions and the imbalances in the internal five massive organs.

When she received the COVID-19 vaccine, this vaccine is considered a highly concentrated medication and according to Arndt Schultz Law, created in 1888, and shown in Figure 9, they can reduce the vital energy and can induce the formation of many

kinds of disease that came from energy deficiency situation, as I am showing in many articles written by myself about hypertension, myocardial infarction, strokes, auto-immune disease, and also cancer, etc [2, 21-23].

Figure 9: Arndt Schultz Law

In this specific patient, she used chemotherapy and also associated tools in traditional Chinese medicine to treat the energy imbalances presented in the “root”, which was the cause of all formation of all diseases, according to traditional Chinese medicine’s reasoning. So, when I associated treatment using tools to rebalance the internal energy (using Chinese dietary counseling, auricular acupuncture (showed in Figure 10) with apex ear bloodletting (showed in Figure 11) and using homeopathy medications to restore the energy of the five internal massive or-

gans (showed in Table 4), all her immune system began to work again. Even using chemotherapy (which is considered a highly concentrated medication and could induce severe side effects), she did not have many side effects due to the treatment prevented the reduction of this vital energy, which was important to combat the malignant cells, as I showed in the article written by myself (2022) whose title is *Energy Alterations in Patient with Malignant Thyroid Tumor and How Can We Treat It without Doing Surgery*, Chemotherapy or Radiotherapy [10, 24].

Figure 10: Auricular acupuncture points used to treat patients with cancer

Figure 11: Apex ear bloodletting

Table 4: Homeopathy and crystal-based medications are used to replenish the energy of the five internal massive organs

Chakras	Five Elements	Homeopathy Medications	Crystal-Based Medications
1° Chakra	Wood/Liver	Phosphorus	Garnet
2° Chakra	Water/Kidney	Natrum Muriaticum	Orange calcite
3° Chakra	Fire/Heart	Sulphur	Rhodochrosite
4° Chakra	Metal/Lung	Silicea	Emerald
5° Chakra	Earth/Spleen	Calcarea Carbonica	Blue Quartz
6° Chakra	Water/kidney	Tone 2° chakra	Sodalite
7° Chakra	Wood/Liver	Tone 1° chakra	Tiger eye

Table 4 Homeopathy and crystal-based medications are used to replenish the energy of the five internal massive organs according to the theory of *Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine*.

In this case, when unbalancing the Lungs’ energy with chronic sadness, the hollow organ that is coupled to the Lung is the Large intestine [25].

In this case, the COVID-19 vaccine was not the only factor inducing the formation of cancer because this patient had an emotional problem that contributed to this evolution of cancer formation. This kind of vaccine, as I showed is considered a highly concentrated vaccine, can reduce vital energy, and can trigger the evolution to cancer formation, in a patient very predisposed previously to this evolution [7, 10].

In relation to the second patient, she felt the tumor in the right breast 7 days after the third dose of the COVID-19 vaccine. She is a 40-year-old and had three miscarriages since her wedding fourteen years ago [3, 17].

She also has in common, energy deficiency inside the five internal massive organs, that are responsible for the production of internal energy. For you to understand, the Kidney (second chakra) is responsible for the production of *Yin* and *Yang* energy. The Spleen (fifth chakra) is responsible for the absorption of nutrients and the production of Blood. The Heart (third chakra) is responsible for controlling the normal flowing of Blood inside the Blood vessels. The Liver (first chakra) and Lungs (fourth chakra) are responsible for the distribution of all energy inside the body or *Qi* as I am showing in Figure 6 and also showed in the article written by myself (2021) whose title is *Why Patients With Spider Veins in The Leg Have Recurrence of Their Conditions By Using Sclerotherapy or Other Kinds of Treatment Recommended Nowadays?* [12]

This patient also has emotional problems related to her father as I wrote in the article (2021) titled *Chakras' and energies deficiencies in the geneses of breast cancer*, patient with breast cancer has in the background, a history of emotional problems with her father because he is a professor of Law in France and asked her to study law. As she does not want to do anything against her father, she studies law but in the deepest of her heart, she does not like to study law. In her case, her breast cancer occurred in the right (related to emotional problems with her father) and when the breast cancer is on the left side, it is related to emotional problems with her husband in the same position of the heart [26].

In the case of breast cancer, it is very common to see more cases in Western countries if we compared it with the incidence in Eastern countries. One of the differences is the consumption of dairy products because according to traditional Chinese medicine, the formation of all kinds of tumors is related to the formation of Phlegm caused by Spleen and pancreas energy deficiency, caused by excessive consumption of dairy products, raw foods, Coldwater and sweets. And this patient reported in the case of report two likes to eat cheese very much, having more tendency to have an accumulation of Phlegm, one of the energy alterations favoring the formation of breast cancer [26].

For this reason, one of the causes of the formation of cancer after the COVID-19 vaccine could be also the association of wrong eating habits. For this reason, it was orientated to all patients reported in this article, the changes in the dietary aspects, be-

cause the wrong eating habits are the first factor that is leading to energy imbalances in the "root". The orientation to avoid the ingestion of dairy products, raw food, Coldwater, and sweets, has the intention to avoid Spleen and pancreas energy deficiency, which is responsible for the absorption of nutrients and the production of Blood. The imbalance of this energy can create the accumulation of Phlegm and have more tendency to have breast cancer [8].

The orientation to avoid the ingestion of coffee, soda, and matte tea has the intention to not cause an imbalance of Kidney energy meridian (second chakra), responsible for the production of *Yin* and *Yang* energy. The Kidney's energy is also important in keeping the health of bones, and teeth, reproduction, sexuality, memory, and concentration [8 -27].

The orientations to avoid the ingestion of fried food, eggs, honey, coconut, melted cheese, and alcoholic beverages have the intention to avoid the energy imbalances in the Liver and Gallbladder and cause the formation of more internal Fire. This formation of internal Fire is one of the energy imbalances responsible for the production of cancer according to traditional Chinese medicine, in an energy point of view [10].

As said by Hippocrates (c. 460 BC - c. 370 BC), the father of medicine, in one of his quotes "make your food your medicine and your medicine, your food" [4].

In case report two, the patient did an extensive evaluation on April 2022 in her routine gynecological exam, making a pap smear exam, and mammography, and all her exams were normal at that time.

She felt a lump in her right breast 7 days after receiving the third dose of the COVID-19 vaccine.

In this case, I think that cancer development is not going into the normal phases, which I showed in Table 4. Normally, when the patient has cancer, the patient is at phase 5 from development from health to disease formation. And to have cancer formation from phase 1 to 5, it necessitates 10 years or more of energy imbalances to evolve into cancer in phase 5. I wrote about this issue in the article written by myself (2021) whose title is *Chakras' Energy Deficiencies as the Cause of Fatigue Post SARS-CoV-2 Infection Patients Treatment* where I am showing one case of a patient inserted in 2002, a dental implant made of titanium that evolves in 2014 to a prostate cancer twelve years after the titanium implant. [28, 29]

Table 4: Formation from Health to Disease

Progression from Health to Disease				
	Organ	Exams	Energy Reserve	Symptoms
Phase 1	Slowing down of organ functions	Normal	Energy Reserves-normal	Without clinical symptoms
Phase 2	Slowing down of organ functions	Normal	Consumption of internal Energy Reserves	With symptoms in another organ

Phase 3	Slowing down of organ functions	Normal	Consumption of external Energy Reserves	With symptoms in the same organ
Phase 4	Reversible cellular lesion	Little alternation	Consumption of blood Reserves	Curable disease
Phase 5	Irreversible cellular lesion	Excessive alteration	Metabolic exhaustion	Incurable disease

This rapid evolution to cancer shown in case report 2 after receiving the third dose of the COVID-19 vaccine seems to have the same evolution as patients with HIV have when they have syphilis. In patients with HIV, when they acquire syphilis, there is a possibility to have tertiary syphilis in the acute phase of this infection, as we are working with immune-compromised patients and not immune-competent ones [30].

So, in her case, as we are vaccinating immune-compromised patients and this specific patient has another history of thyroid cancer eight years before the breast cancer, this patient was very immune-compromised for years, probably for more than 18 years (eight years due to the gap between thyroid cancer and formation of breast cancer and 10 years to have energy deficiency to evolve to thyroid cancer) [9, 24].

In this situation, COVID-19 vaccine vaccine was not the primary cause for the formation of cancer but it is considered a highly concentrated vaccine, with the potential to reduce the vital energy, that is already low in quite the majority of our population nowadays, inducing or trigger the deficiency of the energy, causing a state of weakness in energy level, responsible for the increased chance to have any type of cancer, because the mechanism of protection against the formation of cancer was disrupted allowing the malignant cells to multiply if our energy is not enough to combat these cells [2, 24].

Every day, our body produces malignant cells and when our immune system is working properly, these malignant cells can be eliminated by our immune system every day. But when our immune system is not working, like in this case, when our energy is not adequate, these malignant cells can increase and cause malignant tumor formation in the “leaf” level of the tree. In this case, I cannot say that the use of the COVID-19 vaccine was the only condition to trigger the cancer formation in all these patients but it can cause a major reduction in our vital energy, which was proven very low prior to the COVID-19 pandemic and could worsen with the use of any kind of highly concentrated medication, in this case when using the highly concentrated vaccine for COVID-19 prevention [2].

In this case, there is a tendency to evolve more quickly to phase 5, because all patients that are receiving the COVID-19 vaccine are considered very low in energy for many years prior to the COVID-19 pandemic, as I am demonstrating in the article written by myself (2021) titled *Energy Alterations and Chakras' Energy Deficiencies and Propensity to SARS-CoV-2 Infection*, and if we use any kind of highly concentrated medication or highly concentrated vaccine, we will reduce even more this energy, that was already very low for years before this vaccination and can trigger the alterations favoring the cancer formation because we will cause more immune deficiency instead of improvement [7].

In the case of case report two, the patient did routine gynecology exams on April 2022, and she began to have breast cancer symptoms, 7 days after receiving the third dose of the COVID-19 vaccine on July 2022. As she had a past history of thyroid cancer eight years before the breast cancer formation, in her treatment, Western medicine usually treats the symptoms (that is cancer itself) but the energy deficiency alterations that are in the background (and considered the cause of cancer formation according to traditional Chinese medicine) usually is not treated, because these energy alterations are invisible by the naked eyes and Western medicine consider only ‘scientific’ what they can prove at the laboratory or radiology level. For this reason, these alterations are not studied by doctors nowadays but according to traditional Chinese medicine, it is in this energy level that all alterations in the formation of the majority of diseases are, and if we do not treat these energy alterations and treat only the symptoms caused by these energy imbalances, we will not treat the cause of disease formation but only treating the symptoms. In her case, this patient evolved very quickly to the formation of a tumor in her right breast (about 10 cm) and initially, she was not afraid that could be anything bad because she went to a gynecology exam in April 2022, and the doctor said that all exams were normal. But Western medicine usually does the diagnosis through laboratory alterations but if we analyze the energy deficiency condition of this patient, we would start to treat this condition and probably could not evolve into cancer in July 2022. All this information was presented at the Global Virtual Congress on Cancer Research & Drug Development that was held on March 07-08, 2022 [31].

In case report two, she also received two different kinds of vaccine (Janssen, Pfizer) and this was a strategy was used by countries facing difficulties in supplying enough vaccines in some countries. According to Rashedi et al. (2022) in an article titled *COVID-19 vaccines mix-and-match: The concept, the efficacy, and the doubts*, this association has been associated with higher humoral or cellular responses without increasing the adverse reaction [32].

The treatment of this condition (energy deficiency and formation of internal Fire) can lead to a cure for patients with cancer, as I showed in the article written by myself (2020) entitled *The Importance of Treating Energy Imbalances and Chakras Replenishment for Prevention and Treatment of Cancer*, and in the second article also written by myself (2022) titled *Energy Alterations in Patient with Malignant Thyroid Tumor and How Can We Treat It without Doing Surgery, Chemotherapy or Radiotherapy* [2, 24].

The treatment using energy as the basis for the treatment of cancer can reduce the tumor, as I showed in the case of the report one (the patient had colon cancer and after receiving the ener-

gy-based treatment, the tumor that seems an orange disappeared in the colonoscopy). In the case of report two, the patient reduced her breast tumor to one-third only using acupuncture with the intention to balance the *Yin, Yang, Qi*, and Blood and tone the energy of the five internal massive organs using highly diluted medications according to the theory created by myself (2020) titled *Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine* [33].

For this reason, I wrote (2022) an article recently published titled *Why is Highly Diluted Oral "Vaccine" For COVID-19 the Safest Option in this Pandemic?* saying that this kind of vaccine is the safest option in this pandemic, due to the energy pattern that quite an entire population globally is suffering, characterized as very low energy, leading to the necessity to shift to another type of highly diluted medication to be used nowadays, as I am saying in the article written by myself (2021) titled *Why is Homeopathy the Medication of Choice in the Treatment of All Kinds of Diseases Nowadays?* [3, 34]

The third patient reported in this article that evolve into skin cancer after the COVID-19 vaccine has in common, energy deficiency inside the five internal massive organs. She had alterations in the skin near the nose since the first COVID-19 vaccine (CoronaVac -March 23rd, 2021) that culminate in skin cancer after receiving the fourth dose of the COVID-19 vaccine (April 4th, 2022). In her case, she also has this energy deficiency and she was also considered immune deficient prior to receiving the vaccination, because of the study that I did in my clinic, I demonstrated that 90% of all my patients were in the lowest level of energy and if I did my study today, I would say that 100 % of all my patients were without any energy, including babies, children, adolescences, young adults and older patients, independent on the type of diagnosis [2, 7].

In this case report three, she also received a combination of vaccines (CoronaVac, Pfizer, and Janssen).

The fourth patient reported in this article had meningioma diagnosed in December 2021 after two COVID-19 vaccines (the first was on August 14th, 2021 and the second dose was on September 11th, 2021) but she had the first symptoms on February 2021, before the vaccination, so in this case, the formation of meningioma was not caused by the vaccines. After the surgery on March 2022, she was not able to ingest anything and she was diagnosed with gastric cancer through endoscopy (after the third dose of COVID-19 vaccine made on February 2022-Pfizer). The use of

a highly concentrated vaccine induced a reduction of these energies and cause a propensity to evolve or complicate one cancer state. In this case, we cannot say that the patient evolved to gastric cancer after vaccination but she could probably some alterations prior to vaccination or not, we cannot know exactly what was happening in his case, but the use of any kind of highly concentrated vaccine in this new type of population (characterized as very low in energy) will reduce even more this energy and will drop the vital energy, important to our immune system and will allow the formation of any kind of disease because all of them have in common, energy deficiency inside the five internal massive organs and can cause many types of diseases such as diabetes, myocardial infarction with or without arterial obstruction, hypertension, auto-immune disease, strokes, thrombosis, etc. or even any kind of cancer [2, 6-10, 12, 13, 18-27].

She also had anemia that could have weakened the immune system but the treatment she received replenishing the energy of the five internal massive organs allowed her to have a better outcome after doing surgery to remove the stomach and to have the energy to combat the formation of more malignant cells in her body [2, 33].

The fifth patient complained of symptoms of gastric cancer 5 months after receiving the fourth dose of the COVID-19 vaccine on April 2nd, 2022. He also has energy deficiency inside the five internal massive organs and the use of the highly concentrated vaccine for the prevention of COVID-19, this kind of vaccine would reduce more vital energy and will cause more propensity of any kind of disease, in this case, he developed gastric cancer. In his case, I cannot say that he does not have this disease prior to the vaccination but what his daughter said was that all the things were happening very quickly. She said he was very strong before receiving the vaccines. He had a family history of gastric cancer. In his case, the use of highly concentrated medications such as chemotherapy can also cause a drop in this energy and can cause more complications or even death of this patient, as I am showing in the article written by myself (2022) titled *Can the Use of Chemotherapy Induce More Formation of Metastases in Patients with Cancer?* [35]

The five patients reported in this article have in common, energy deficiency inside the five internal massive organs, as I demonstrated in the research shown in Table 2, where I am saying that 90% of all my patients attended from 2015 to 2020 wherein the lowest level of energy, the same result found in all these five patients, and you can see the results in Figure 12 [2].

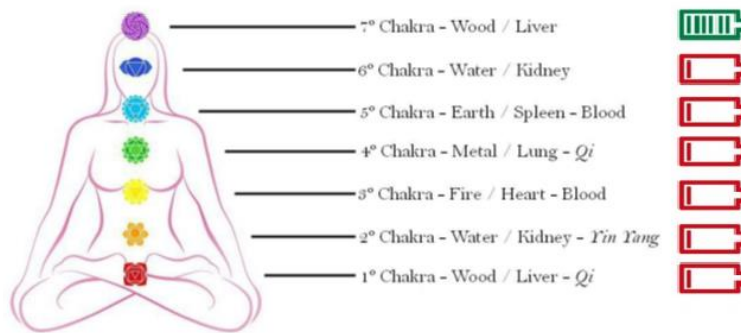

Figure 12: The results of the measurement of the chakras' energy centers of the five patients correspond to the energy-deficient state of the five internal massive organs in traditional Chinese medicine (Liver, Heart, Spleen, Lungs, and Kidney).

According to traditional Chinese medicine, cancer came from energy deficiency and the formation of internal Fire all patients reported in this article have the same energy deficiency as the population that I am attending in Brazil, prior to this vaccination, and they reduced, even more, the vital energy, after receiving this type of vaccine, considered highly concentrated vaccine and worsening the energy necessary to prevent the formation of cancer or metastasis [2, 3, 17].

In the case of this fifth case report patient, he had in the past the history of working for 8 years, during the night as a guard at a shoe factory in the city of Franca. It is during the night that it is occurring the energy replenishment of all organs, mainly the Kidney organs, which are responsible for the production of *Yin* and *Yang* energy and all energies will decrease if *Yin* and *Yang* will reduce, as I am showing in Figure 13. When the patient does not sleep during the night, the internal energy will drop and will have more propensity to have diseases, mainly diseases caused by energy deficiency of the Kidney [25].

Figure 13: *Yin*, *Yang*, *Qi*, and Blood.

The interrelationship between *Yin*, *Yang*, *Qi*, and Blood is the cornerstone of all treatments in traditional Chinese medicine, and the treatment rebalancing and replenishing of the internal five massive organs' energy is of paramount importance to treat the "root" of the formation of all diseases in the "root" level of the tree, even the doctor does not know that the patient has such symptom. This theory was presented at the Acupuncture Research Conference that was held in Boston at Harvard Medical School [8, 10].

Yin and *Yang* are produced in the Kidney. *Qi* is produced in the Liver and Lungs. Blood is produced in the Spleen and the Blood

flow inside the blood vessels is controlled by the Heart [12].

As I showed that all internal massive organs were in the lowest level of energy, this means that the energy of *Yin*, *Yang*, *Qi*, and Blood is not produced adequately, causing more propensity to have thrombosis or myocardial infarction after receiving any kind of highly concentrated medication or highly concentrated vaccine [3, 22].

In the article recently written by myself (2022) entitled *Can the Use of Chemotherapy Induce More Formation of Metastases in Patients with Cancer?* I am showing that patients with cancer can increase the chance to have metastasis when using chemotherapy, because this type of medication is considered highly concentrated medication and according to Arndt-Schultz Law (Figure 8), created in 1888 by two German researchers, the use of any kind of highly concentrated medication can reduce the vital energy, and the use of highly diluted medication can improve the vital energy and reduce the side effects induced by highly concentrated medications [31, 36].

In the case of case report one, she did not have problems when using chemotherapy, because she was treating the energy-deficient state of her internal five massive organs using Chinese dietary counseling, auricular acupuncture with apex ear bloodletting, and systemic acupuncture. She was also using homeopathy medications according to the theory of *Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine* and for this reason, she did not have any complications when using chemotherapy [33].

This result was very different when looking at the neighbor of case report one, who had the same problem with her colon cancer but was not using a complementary therapy, treating energy deficiencies in the five massive internal organs, and therefore complained of a lot of weakness and daily indisposition when she was using chemotherapy [35].

In this article, instead of highly diluted vaccines, I am discussing about the use of highly concentrated vaccines, which can reduce even more this vital energy and cause more propensity to evolve to phases four and five of the evolution from health to disease formation. You can see this evolution from health to disease formation in Table 4 [2, 8].

In this Table 4, cancer is considered phase 5. But to evolve to the last phase, there is the necessity to have many years of energy deficiency situation in phases one, two, and three (when the patient has symptoms but the laboratory and radiological exams are still normal). Western medicine is making the diagnosis of diseases only in phases 4 or 5 when there are alterations in the laboratory exams. We need to begin to treat the patients in phases one, two, and three when the patients have symptoms but the laboratory exams are still normal [2].

For this reason, I just published (2022) another article entitled *Why is Highly Diluted Oral "Vaccine" For COVID-19 the Safest Option in this Pandemic?* I am saying that this type of highly diluted oral "vaccine" is the safest choice to be used in this pandemic, due to the type of population that we are attending nowadays, considering that quite the entire patient is immune deficient and not immune competent [3, 17].

In another webinar that I participated in recently, I give one talk saying that the chronic use of psychotropic medications can increase the chance to have cancer. In this presentation, I chose one patient that has a diagnosis of prostate cancer and had a past history of using psychotropic medications for the last 18 years for the treatment of anxiety and panic syndrome. The use of all these highly concentrated medications can reduce our vital energy and leads to an increase in the chance to have cancer in the future because the evolution from health to disease is divided into five phases. In the first three phases, there are energy deficiency alterations but the laboratory exams are normal. Cancer is formed in phase five but according to Western medicine, they understand that patients with cancer (phase five) cannot return to phase four or three. But in an article also written by myself (2020) titled *The Importance of Treating Energy Imbalances and Chakras Replenishment for Prevention and Treatment of Cancer*, I am showing three cases reports, all with a diagnosis of cancer but all of them evolve to phase five to four and the second to phase five to three only rebalancing and replenishing the internal five massive organs energy using highly diluted medications according to the theory *Constitutional Homeopathy of the Five Elements based on Traditional Chinese Medicine*. The last patient went from phase five to phase three [2, 20].

The worry, in this case, is how can we prevent the formation of cancer in all the populations that received the COVID-19 vaccine. The answer to this question is that, if we increase our vital energy, which is very low prior to the vaccination, we can prevent the formation of any kind of disease in the "leaf" level of the tree, in this case, prevent the formation of any kind of chronic disease, in this case, cancer, increasing our vital energy, as I am showing in the article entitled *The Importance of Treating Energy Imbalances and Chakras Replenishment for Prevention and Treatment of Cancer* [2].

Another problem involved in the COVID-19 vaccine in the development of cancer is that according to the article written by

Derek (2021) titled *Coronavirus Vaccines and Cancer*, there is a real problem with DNA repair enzymes that raise the risk to develop a variety of cancer [36].

In this article, he is saying that defective in these pathways have been associated with breast cancer and other solid tumors such as ovarian cancer. Also, can be associated with some types of skin cancer, including colorectal cancer. The various changes in connections can cause a protective effect against cancer or an effect that increases the risk of having cancer and this is still being studied and is hard to work into a coherent mode [37].

In all cases reported in this article, all patients received a combination of the COVID-19 vaccine. According to the study written by Nan et al. (2022) whose title is *Humoral and Cellular Immune Responses to Vector, Mix-and-Match, or mRNA Vaccines against SARS-CoV-2 and the Relationship between the Two Immune Responses*, there were differences in immune response induced after mix-match vaccination depending on sex or age of each individual. According to this article, the mixed match of mRNA vaccine induced a robust immune response [38].

But there are no studies in the literature showing that the mix of mRNA vaccine could induce more propensity to have any kind of cancer, as I am demonstrating in this article that all five patients with cancer diagnosis after receiving the COVID-19 vaccine have in common, the mix of vaccination using two or three different kinds of the COVID-19 vaccines. In case report one, she uses CoronaVac and Pfizer. In case report two, she used Janssen and Pfizer. In case report three, she used CoronaVac, Pfizer, and Janssen. In case report four, she used CoronaVac and Pfizer. In case report five, he used CoronaVac, Pfizer, and Astra-Zeneca. All articles that we have in the literature are studying the propensity of cancer patients to acquire COVID-19 and the necessity of vaccinating this group of patients [38].

To understand which factors, increase the chance to have any type of cancer when using a highly concentrated injected vaccine, we need to understand which type of population we are attending nowadays, to know which type of vaccine we need to use, as I am showing in the article entitled *Why is Highly Diluted Oral "Vaccine" For COVID-19 the Safest Option in this Pandemic?* [17]

To understand this theme, it is necessary to combine thoughts from Western medicine and from traditional Chinese medicine, as I am showing in the *Yin and Yang* metaphor. *Yin* (the part of the symbol in black) is considered Western medicine, as it is representing materialized energy and *Yang* (the part of the symbol represented by white) represents non-materialized energy. Both kinds of medicine are different but complementary, as I am showing in Figure 14 and Figure 1 of the metaphor of the tree [2, 17].

Figure 14: Yin and Yang metaphor of Western and traditional Chinese medicine.

Conclusion

The conclusion of this study is that having cancer after receiving the COVID-19 vaccine does not mean that the cancer was caused only by the vaccine, but there are hereditary factors, diet factors, emotional factors, and energy factors involved in this condition that we need to know all these aspects to treat the patient accordingly and not just treating the symptoms, that is the formation of cancer itself. Patients that are having cancer after receiving the COVID-19 vaccine have in common, energy deficiency inside the five internal massive organs (Liver, Heart, Spleen, Lungs, and Kidney) according to traditional Chinese medicine's point of view and they are responsible for the production of internal energy to keep our health in a balanced state and to keep our immune system and protect against the formation of any kind of disease. There is a necessity of increasing the energy of the population that received this kind of vaccine to increase the vital energy and protect the body against the formation of these kinds of diseases. To this end, there is the necessity of using highly diluted medications according to the theory of *Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine*. In all cases, we can note that 100% of the patients reported in this article received a combination of the COVID-19 vaccine. There is a necessity for more studies in this field to try to understand the reason for increasing the chance to have cancer after receiving a mix of COVID-19 vaccination.
